

ABDULRAHMAN HASSAN

• Cairo, Egypt 📞 +20 1146739717 ✉️ abdulrahman.gomaa.h05@gmail.com 🌐 [linkedin.com/in/abdulrahman-gomaa](https://www.linkedin.com/in/abdulrahman-gomaa) 🏠 github.com/abdulrahman-111

Profile

Aspiring **Machine Learning and AI Engineer** with hands-on experience in Python, data analysis, machine learning, and deep learning through academic and personal projects. Proficient in building end-to-end ML pipelines and data-driven solutions using Pandas, NumPy, Scikit-learn, and visualization tools, with applied experience in feature engineering and Convolutional Neural Networks (CNNs) for computer vision. Passionate about artificial intelligence, data science, and MLOps, with additional working knowledge of Linux, Git, DevOps tools, and cloud fundamentals.

Education

Egypt University of Informatics

B.Sc. in Computer Engineering / CGPA: 3.98/4.00

Oct 2023 – Present

Cairo, Egypt

Purdue University

ECE 30100: Signals and Systems / Grade: A+

Jun 2025 – Sep 2025

Online Coursework

Experience

Digital Egypt Pioneers Initiative (DEPI)

Nov 2025 – Jun 2026

DevOps Intern

Remote

- Containerized applications using Docker, building and managing images to establish reproducible, portable environments aligned with ML deployment best practices.
- Automated system provisioning and deployment tasks via Ansible playbooks, applying Configuration as Code (CaC) principles to eliminate manual configuration overhead.
- Designed and implemented CI/CD pipeline workflows integrating container-based deployment strategies to accelerate iterative software delivery.
- Structured version-controlled repositories using Git and authored YAML configurations to standardize development and deployment processes.

National Telecommunication Institute (NTI)

Jul 2025 – Aug 2025

Cloud Architect Intern

Remote

- Completed AWS Academy Cloud Foundations, mastering core cloud concepts and architectural best practices relevant to scalable ML infrastructure.
- Operated and configured core AWS services – EC2, S3, IAM, and VPC – to deploy and secure cloud-based environments.

National Telecommunication Institute (NTI)

Aug 2024 – Sep 2024

Network Essentials Intern

Remote

- Mastered foundational networking concepts including IP addressing, routing protocols, and switching through structured training.
- Executed multiple hands-on labs using packet tracing tools, configuring and troubleshooting IP addressing, routing, and switching scenarios.

Certifications

AWS Certified Cloud Practitioner (CLF-C02) | Amazon Web Services

May 2026 – May 2029

- Demonstrated foundational knowledge of AWS cloud concepts, core services (EC2, S3, IAM, VPC, RDS), security models, and pricing – validated through an industry-recognized exam.

Projects

Smart Attendance System | Python, TensorFlow, CNNs, Deep Learning, OpenCV

Apr 2026 – May 2026

- Developed an AI-powered real-time classroom attendance platform integrating face detection, face recognition, attention monitoring, and emotion analysis.
- Designed, trained, and evaluated deep neural network models using **TensorFlow**, implementing and optimizing **CNN architectures** for facial recognition and emotion classification tasks.

AI-Powered FIFA Career Assistant | Python, Machine Learning, Scikit-learn, Pandas, NumPy

Apr 2026 – Jun 2026

- Engineered an AI-powered decision-support assistant for FIFA Career Mode, applying supervised ML models to evaluate players, simulate match outcomes, and optimize transfer strategies.

- Designed and executed end-to-end ML workflows covering data preprocessing, feature engineering, model training, and predictive evaluation using Scikit-learn, Pandas, and NumPy.
- Produced interactive data visualizations with Matplotlib to surface actionable insights for squad planning and club management decisions.

Warsha Hub | *Python, PySide6, Machine Learning, SQLite*

Dec 2025 – Jan 2026

- Architected an educational social platform integrating **graph algorithms** and a **KNN-based recommendation engine** to deliver personalized follow suggestions and feed ranking.
- Implemented optimized username search and ML-driven content ranking to enhance user experience and platform engagement.
- Structured a modular **SQLite3** backend and interactive **PySide6** frontend with social graph visualization, delivering a complete full-stack ML-integrated application.

My Own Shell | *C, Linux*

Aug 2025 – Sep 2025

- Engineered a suite of custom Linux command-line utilities and progressive shell implementations in C, mastering system calls, process management, and low-level OS fundamentals.

Virtual Meetings System | *C++, SQLite, Design Patterns*

Apr 2025 – May 2025

- Designed and built an event management platform supporting user login, meeting scheduling, and dynamic waitlists using Factory and Singleton design patterns.
- Integrated an SQLite database to persist event data, reducing lookup time and decoupling storage from application logic.

Technical Skills

Languages: Python, C++, C, SQL, SQLite, Shell Scripting

Machine Learning / Data Science: Scikit-learn, TensorFlow, Pandas, NumPy, Matplotlib

Tools / Technologies: Git, GitHub, Linux, Docker, Kubernetes, Helm, ArgoCD, AWS Cloud, Ansible, CI/CD with Jenkins, Terraform

Leadership & Extracurricular Activities

IEEE – Institute of Electrical and Electronics Engineers

Dec 2024 – Present

Secretary, IEEE Computer Society, EUI Student Branch

Egypt University of Informatics

- Spearheaded the planning and coordination of technical events, workshops, and hackathons reaching 100+ students, promoting programming, AI, and cloud awareness across campus.
- Produced meeting documentation, drafted reports, and maintained communication channels between student members and faculty advisors to ensure organizational continuity.
